

O-Insights v2.0

For BMS

Overview:

O-Insights for BMS is a plugin designed to work natively with Tridium Niagara® that facilitates reporting, analytics and dashboarding of BMS data from Niagara.

A solution designed to provide equipment level insights across various integrated systems, O-Insights BMS powers active insights on equipment/asset level and global/site level alike.

Features

- Critical parameters mapping, trends and views
- Agile, flexible and highly customizable dashboard
- Various dashlets that provides in-depth insights
- In Depth History, Alarm and Audit Trail reports
- Trends of Alarm count per site and per sub-site
- Trends of Alarm reason (as configured) per site and sub site
- Break-up of Alarms basis point type/ID
- Alarms drilldown for point/alarm details from the alarms UI
